This same would cause fifty Democratic politicians to escape to Canada.

Why This Change?

The report of the gathering of the faithful at Waterville, Wednesday, state I that the "stupld and cowardly attack made on the chairman by one of the party organs in the State has called forth a rebuke from prominent Democrats all over the State." sets all doubts at rest by ancouncing last evening that "it is quite ready to accept the violent language in question as intended for itself." The writer then proceeds the report that the President gave Gov. ed for itself. The writer then proceeds the report that the President gave Gov. The only question at issue was who could and would best serve the party in the work of organizing for the campsign of 1880. We think that in the diobe of Mr. S. S. Brown, of Waterville, as Chairman the Committee under an enumerally trace selection.

Again on February 3d he said:

"The Commercial feels at liberty to remark, however, that it is quite convinced that the Republican party will find Mi Brown young and progressive enough to

The country is informthat of which Mplien was proven guilty. On the night proceeding the October and consultragrations is to be consummated election, or carly in the morning of that ed in the course of two or three years. In day, he caused the arrest of over one hun dred inoffensive colored men. They were arrested without warrant; they charged no crime; but they were limited form can be appreciated. In the meantion together in prison, without communication any further force with me. All of the cases recommended by him were at once held up, and no appointments which ho suggested have been made since that time without an independent investigation by the department." Just why he should send out such a statement unless ho intended it is not so clear to my one outside the App office.

THE OAR

Boston, Aug. 13. Between 18,000 and 16,000 people witnessed the final contests in the 18th annual regatts of the National Association of Amateurs on Charles River to-day. The twer was covered with all sorts of boats and the balconies and versaudas of the best houses were diled with spectators, many indices hefug present. The conditions for excellent sport were as favorable as could have been wished for with the exception that on the upper end, or starting point of the column gusty, had a free sweep over the river, the water was, somewhat lumpy. With these invorable circumstances the second day's racing of the regatts and the regatts itself would have been as successful as say in the histhe regatta and the regatta itself would have been as successful as any in the his tory of the association had it not been for the disagreeable termination of the double scull rule. As it was, however, the perfect success
